

SmarterWX Locate

A system of record for managing BYDA enquiries at scale

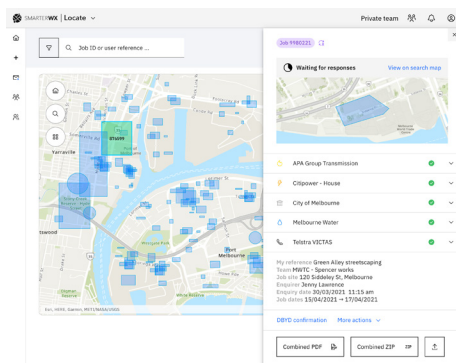

To coordinate works near underground infrastructure with minimal risk while ensuring safety, organisations need to manage Before You Dig Australia (BYDA) enquiries effectively.

How we can help

We help organisations manage BYDA enquiries through a secure, cloud-based solution aligned to the national referral service. SmarterWX Locate provides a centralised system for managing and retaining BYDA information across teams which helps improve coordination, strengthen compliance, and enable safer operations near underground infrastructure.

Why it matters

SmarterWX Locate creates a central source of BYDA information, accessible to all project stakeholders. This integrated approach supports collaboration between teams, enhances transparency, and ensures compliance. It also streamlines access to BYDA information, reducing the time spent managing responses from asset owners. To reduce compliance risks and meet regulatory requirements for audits, SmarterWX Locate retains BYDA activity records for seven years, further improving access to critical information.

Outcomes for you

Adopt an organisation-wide approach to managing safety and protecting assets on large projects with multiple stakeholders.

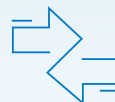

Improve transparency and compliance with a central source of truth for the management of BYDA activity.

Support collaboration by creating a shared view of all BYDA activity through multi-user collaboration tools.

Reduce the risk of costs from accidents and improve compliance with a full audit trail across all BYDA activity.

Integrate BYDA information with geographic information system (GIS) platforms and workflows to leverage existing investments and streamline user access.
