

# Web Application Configuration

## Learn skills to create, configure, and share ArcGIS web applications

With the necessary training, organisations can empower their users to configure and deploy a wide range of web applications and extend the use of ArcGIS.

### How we can help

Our *Web Application Configuration* training courses help organisations teach their users how to configure, deploy, and share web applications that meet user and organisational needs. The training includes courses for major ArcGIS web applications and builders, such as ArcGIS Dashboards and ArcGIS Experience Builder.

### Why it matters

Web applications enable users of all skill levels to discover, use, and share geographic information and make it easier for internal and external stakeholders to use ArcGIS and contribute geospatial data. These training courses help extend the use of ArcGIS across an organisation by empowering more users to create applications for widespread use, maximising the value of ArcGIS.

#### Benefits of our training courses

- ✓ Sole provider of Esri certified ArcGIS training courses
- ✓ Esri and Train the Trainer (AIM) certified Trainers
- ✓ Trainers with real world experience supporting ArcGIS products
- ✓ Instructor led training integrated with free online training courses
- ✓ Dedicated training team of full-time trainers

### Outcomes for you

Gain foundational knowledge for creating, configuring, and sharing web maps and applications using ArcGIS Online.

Understand the essential concepts and workflows to create, configure, and share ArcGIS Dashboards.

Explore concepts, best practices, and decisions for creating, configuring, and sharing ArcGIS StoryMaps.

Apply best practices for creating, configuring, and data collection with ArcGIS Mobile Applications.

Become proficient at creating, configuring, and publishing map and data-centric web apps using ArcGIS Experience Builder.
