

Enterprise GIS Governance Assessment

Maximise GIS value by aligning investments with strategic goals.

Lack of alignment between geographic information system (GIS) investments and strategic objectives restricts effective GIS adoption and limits its full capabilities.

How we can help

Our tailored governance framework maximises the value of GIS investments by aligning them with strategic priorities. By optimising GIS operations according to industry best practices, we improve alignment between organisations and geospatial technology. Our *Enterprise GIS Governance Assessment* enables organisations to create a fit-for-purpose GIS environment, empowering users to meet operational demands effectively and efficiently.

Why it matters

Organisations need strong alignment between their objectives and their GIS to unlock its full potential. They also need a robust and well-maintained GIS IT environment, comprehensive user training, and rigorous quality standards for geospatial technology and data. Additionally, consistent usage and access controls are crucial to maintain data integrity and maximise GIS capabilities. Without these measures, the impact and value of a GIS to an organisation are significantly reduced.

Outcomes for you

Maximise the return on investment for the GIS and the value it provides to your organisation.

Improve current and future alignment between the GIS and organisational objectives.

Optimise your organisation's GIS and fully leverage its capabilities.

Empower users to conduct effective operations using your GIS.

Develop a comprehensive governance program that supports your GIS at an organisational level.
